Subject: Stamped Shadow Flicker and Acoustic Studies and Follow-Up
Attachments: NEES APW Shadow Flicker Study Stamped 100510.pdf; NEES APW Acoustic Study Stamped 100510.pdf

Bill/Steve/Bob,

Attached are the revised stamped versions of the Acoustic Study and the Shadow Flicker Study, both dated 10/05/2010. Both studies include a table of the history of all submitted versions and the rationale for each revision on page 2 as you requested. Atlantic Design spent a considerable amount of time carefully making sure that all of your latest round of comments were incorporated into the study reports. I reviewed this latest version and cross-compared it to your list of comments from your email of 9/27/2010. It looks to me as if all of your (and Bob Burkard's) comments have been carefully incorporated into the studies. Please review them and let me know if you agree. These are large documents and the remaining changes are relatively few, very specific, and all related to the text portion of the document and not the analysis itself. So I believe the most efficient way to wrap this up and to have you feel comfortable that all your issues have been addressed would be to do a conference call with you today that would allow us to concisely walk through your comments (from the email of 9/27/2010) and point out to you where the additions/revision have been inserted to address the comments. That way, we can submit final stamped documents prior to next week's Site Plan Review meeting that everyone is comfortable with.

Under separate cover from these studies will be the combined shadow impact/acoustic impact table for the 17 affected residences that Bill had asked for. This should be provided before the Planning Board meeting next week. Also, under separate cover will be the entire electronic file with the complete list of inputs (and sources) for the studies that you requested from Atlantic Design Engineers. ADE had communicated to me that these will be sent to you tomorrow.

Can you make a conference call at 1:30 p.m. today? Rich Tabaczynski (Atlantic Design) will be available at that time. Please confirm

Thanks,

Rod
