**Subject:** RE: Flicker Mitigation Plan - Follow Up Request for Comments

Rod,

I did provide preliminary comments to Bill. However, more time is needed to read thru the material to perform a complete review. I also suggested to Bill that it would probably be necessary to have a conference call to go over mitigation plan before it is finalized. With regard to schedule, on numerous occasions APW has promised to submit a document by a certain time and date and not delivered. Then, when it is finally submitted, unreasonable demands are made to review it in a very short timeframe. For example, most recently you indicated the final red line would be e-mailed yesterday morning yet it arrived in the afternoon. While it was only a few hours late, you must appreciate that we are not on standby to drop everything and respond immediately. I'm also constrained with budget issues and having to get approval from the town to proceed which further complicates finding the available time. However, I believe on our end we have been more than accommodating in reviewing material that is submitted in a timely manner.

Unfortunately, I have some pressing deadlines to meet for other clients. I will not be able to look at any more material on the Douglas woods project until tomorrow afternoon at the earliest. I'm sorry for any inconvenience this causes you but I will get to it as soon as I can.

Bob

**Subject:** Flicker Mitigation Plan - Follow Up Request for Comments

Bill,

At the Planning Board meeting of 9/28/2010, we submitted the draft Flicker Mitigation Plan to the Planning Board with electronic copies to you, Steve Zisk, and Bob Burkard, along with a request for any comments or feedback by the end of that week (10/1/2010). Since then, Bob Burkard communicated to us that he would not be able to complete his review until earlier this week. From what I heard from Bob, he has completed his review and submitted his comments to you a couple of days ago. Can you please review his comments, add any comments of your own, and submit the combined list to Atlantic Design Engineers and me before the end of the day today so we can make revisions to the plan? This would be greatly appreciated. As we indicated earlier in the week, we will present the Flicker Mitigation Plan at the Planning Board meeting of 10/26/2010. In order to give the affected neighbors a copy of the plan as well as appropriate notice of

the meeting, we need to complete the plan by Friday (tomorrow) so we can make copies and mail out the plans and notice at the beginning of next week to the affected neighbors.

Thank you,

Rod
