This letter is concerning wind farm douglas is waiting for! Please forward this letter to ALL concerning departments,people,residents,and whoever it may concern. I am writing regarding the people against green energy and a good help to our town! there is a resident of webster that seems to be fighting this because it is close to his fancy rich house and or neighbor hood. if you look at mr. anders /rampco construction. you will see about everything they do is anti green! and just about the almighty dollar.you can bet if this was webster doing this and not near mr. anders ' house he would shut the town of douglas down in a second! some of his complaints.. hazardous waste..i believe American wind will dispose of this in a proper way. i would bet rampco/re: mr.anders generates alot more hazardous waste! not to mention damage to infrastructure with the heavy trucks and equipment they use! rampco strips the land with sand and gravel operations, cutting of trees, blasting,and more, they only replace green when required! not to mention the amount of co2 they produce.also mentioned dangers of wind turbines falling?? i don't think so there might have been an extreme case somewhere. wind turbines are and have been constructed an hundreds maybe thousands of schools and other organizations! if there was a danger would this still be going on? talking about the view.. wind turbines are not ugly to look at, not at all! the residents of blueberry hill when at home look over webster lake, not back into the woods of douglas. mr anders talks about the cost of electricity ,that it will rise..seriously if we do not have to produce electricity will oil,coal,gas and the co2 they produce in a few years we all will benefit! lets get the turbines moving!!!
